BACKGROUND

For Muslims, Islam is a way of life. It's anchored around the Islamic faith-inspired ethical needs of Muslims, such as modesty, family values, social responsibility, fasting, halal food, and sharia financing. These values drive Muslims to choose their lifestyle products and services.

Based on the State of the Global Islamic Economy 2022 Report presents the continued momentum of the Islamic economy. The report covers the following sectors: halal food, Islamic finance, Muslim-friendly travel, modest fashion, halal pharmaceuticals, halal cosmetics, and Islamic-themed media and recreation.

This report estimates that Muslims spent US\$2 trillion in 2021 across the food, pharmaceutical, cosmetics, fashion, travel, and media/recreation sectors. All of which are impacted by Islamic faith-inspired ethical consumption needs. This spending reflects an 8.9% year-on-year growth from 2020, with Islamic finance assets estimated to have grown to US\$3.6 trillion in 2021, up 7.8% from US\$3.4 trillion in 2020
